## Management Professor Recognized for Highly Cited Research

February 1, 2018

Dr. Mike Peng of the Naveen Jindal School of Management at UT Dallas has been named to the 2017 list of Highly Cited Researchers from Clarivate Analytics (formerly of Thomson Reuters).

Peng, O.P. Jindal Distinguished Chair of Management, is on the roster for the fourth consecutive year.

This year's list includes more than 3,300 researchers in 21 fields of the sciences and social sciences. These scholars have published a high number of papers that rank in the top 1 percent most cited in their respective fields over the last decade, and have been listed in *The World's Most Influential Scientific Minds*.

Peng, a professor of organizations, strategy and international management, is among the 93 scholars named in the field of economics and business.

"It is gratifying to see that my research continues to be of value to the scholarly community worldwide," Peng said. "There is vigorous competition in the market for ideas, whose winners are cited. Given space constraints, the number of references in every paper is limited. Therefore, overly narrow, non-essential, and non-novel publications will not be widely cited. I have always endeavored to take on some big questions, which is a risky research strategy. But I am glad it has paid off."

A leading expert on global business strategy, Peng is best known for his development of the institution-based view of strategy and his insights about the rise of emerging economies in global business.

His research has investigated business strategies in Africa, Asia, Europe and North America. Both the United Nations and the World Bank have cited his work.
